# III Semester B.B.A. Examination, February/March 2024 (Freshers and Repeaters) <br> (NEP Scheme) <br> BUSINESS ADMINISTRATION Cost Accounting 

## Time : $2^{112}$ Hours

Max. Marks : 60
Instruction : Should be written in English only.

## SECTION - A

1. Answer any five of the following, each question carries $\mathbf{2}$ marks.
a) Define cost accounting.
b) What is direct material ?
c) What do you mean by invoice?
d) Give the meaning of $A B C$ analysis.
e) How do you calculate minimum stock level?
f) How do you calculate Bonus under Rowan incentive plan?
g) Give the meaning of Machine Hour Rate.

## SECTION - B

Answer any three of the following, each question carries 4 marks.
( $3 \times 4=12$ )
2. Explain any 4 methods of costing.
3. Calculate Reorder level, Minimum level, Maximum level and Average level from the following :
Two materials $A$ and $B$ are used as follows :
Minimum usage 50 units per week each
Maximum usage 150 units per week each
Normal usage $\quad 100$ units per week each
Reorder quantity $\quad A-600$ units, $B-1,000$ units
Delivery period A - 4 to 6 weeks, B-2 to 4 weeks
4. Find out EOQ from the following annual usage 4,000 units, cost of material per unit Rs. 2, cost of placing and receiving one order Rs. 5 annual carrying cost of one unit : $8 \%$ inventory value.
5. In a factory the expenses are as follows:

Material ₹ $2,00,000$, labour ₹ $1,50,000$, factory expenses ₹ 98,000 , office expenses ₹ 85,000 and total sales ₹ $5,10,000$. Prepare a cost sheet from the above information.
6. The following information is supplied from the costing records of a company :

Rent Rs. 2,000, Maintenance Rs. 1,200, Depreciation Rs. 900, Supervision Rs. 3,000.

| Particulars | Departments |  |  |  |
| :--- | :---: | :---: | :---: | :---: |
|  | A | B | C | D |
| Floor space (Sq. ft) | 150 | 110 | 90 | 50 |
| Number of workers | 24 | 16 | 12 | 8 |
| Total direct wages (Rs) | 8,000 | 6,000 | 4,000 | 2,000 |
| Cost of machinery (Rs) | 24,000 | 18,000 | 12,000 | 6,000 |

Prepare a statement showing apportionment of costs to various departments.
SECTION - C

Answer any three of the following, each question carries $\mathbf{1 0}$ marks.
7. A company has three production departments and two service departments. Distribution summary of overheads is as follows :

| Particulars | Production departments |  | Service <br> departments |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: |
|  | A | B | C | P | Q |
|  | 40,000 | 25,000 | 10,000 | 4,000 | 3,000 |

The expenses of service departments are charged on a percentage basis which is as follows :

| Service <br> Departments | A | B | C | P | Q |
| :---: | :--- | :--- | :--- | :--- | :--- |
| P | $20 \%$ | $40 \%$ | $30 \%$ | - | $10 \%$ |
| Q | $40 \%$ | $20 \%$ | $20 \%$ | $20 \%$ | - |

Find the total overheads of production departments by using simultaneous equation method.
8. From the following data collected from the books of a company, find out the total price of a work order. Cost of materials Rs. 4,00,000, cost of labour Rs. $3,00,000$, factory on cost Rs. 1,50,000, administration charges Rs. 1,70,000, selling on cost Rs. 42,500, distribution expenses Rs. 42,500.
Factory overheads are based on direct wages, administration and selling and distribution charges are recorded as a percentage of factory cost or works cost. The materials required for the execution of the work order is estimated at Rs. 10,000 and labour cost Rs. 6,000. Assume that the factory overheads have been increased by $10 \%$ and there was no change in case of other overheads. Charge profit at $20 \%$ on selling price.
9. From the following particulars, calculate the earnings of a worker under
a) Straight piece rate
b) Differential piece rate
c) Halsey Bonus Plan (50\% sharing)
d) Rowan premium plan.

Weekly working hours 40
Piece rate per piece
Hourly rate of wages
Rs. 6
Normal time taken per piece
Rs. 15
Normal output per week
20 minutes
Actual output of the worker per week 120 pieces

Differentiate piece rate :
a) $80 \%$ of piece rate for output below normal output
b) $120 \%$ of piece rate for output above normal output.
10. The following transactions occur in the purchase and issue of a material.
a) Jan $2^{\text {nd }} 2020$
Purchased 4,000 units
@ Rs. 4 per unit
b) Jan $20^{\text {th }} 2020$
c) Feb $5^{\text {th }} 2020$
d) Feb $10^{\text {th }} 2020$
Purchased 500 units
@ Rs. 5 per unit
Issued 2,000 units
Purchased 6,000 units
@ Rs. 6 per unit
e) Feb $12^{\text {th }} 2020$
Issued 4,000 units
Issued 1,000 units
f) March $2^{\text {nd }} 2020$ Issued 2,000 units
g) March $5^{\text {th }} 2020$
h) March $15^{\text {th }} 2020$
i) March $20^{\text {th }} 2020$
Purchased 4,500 units
@ Rs. 5.50 per unit

From the above, prepare the Stores Ledger Account, using simple average method and weighted average method.
11. The following particulars relate to processing machine treating a typical material.
a) Cost of Machine Rs. 10,000
b) Estimated life 10 years
c) Scrap value Rs. 1,000
d) Yearly working time ( 50 weeks of 44 hours each) 2,200 hours
e) Machine maintenance 200 hours p.a.
f) Setting up time estimated at $5 \%$ of total productive time and is regarded as productive time.
g) Electricity 16 units per hour at 10 paisa per unit
h) Chemical required weekly Rs. 20
i) Maintenance cost per year Rs. 1,200
j) Two attenders control the operations of machines together with 6 other machines. Their combined weekly wages are Rs. 140
k) Department overhead allocated to this machine p.a. Rs. 2,000 You are required to calculate the Machine Hour Rate.
SECTION - D

Answer any one of the following, each carries 8 marks.
12. The following purchases have been extracted in respect material X. Prepare Stores ledger account under LIFO metḥod :
a) 1-9-2023
b) 3-9-2023
Purchased 800 units at Rs. 8 per unit
c) 8-9-2023
d) 9-9-2023 Issued 700 units
e) 12-9-2023
f) 15-9-2023
Purchased 200 units at Rs. 8.40 per unit Issued 250 units
g) 22-9-2023
Purchased 150 units at Rs. 8.50 per unit Issued 900 units
h) 25-9-2023
Purchased 500 units at Rs. 8.60 per unit Purchased 650 units at Rs. 7.60 per unit
i) 30-9-2023 Issued 550 units

OR
The following figures have been extracted from the costing records of the manufacturing company for the year 2022.
Cost of material Rs. 2,40,000; Wages Rs. 2,00,000; Factory overheads
Rs. 1,20,000; Distribution expenses Rs. 56,000; Administration expenses
Rs. 1,34,000; Selling expenses Rs. 89,000; Profit Rs. 1,60,000.
A work order is to be executed in the year 2023 and the following expenses are to be incurred :
Cost of materials Rs. 32,000; Direct wages Rs. 20,000
Assuming that the rate of factory overheads increased by $20 \%$, administration expenses by $10 \%$ and selling and distribution by $12 \%$. At what price should the product be quoted. So as to earn the same rate of profit on the selling price.
